CHICAGO,

Sept 20 1893

Hon. J. P. Altgeld

Governor State of Ills  
Dear Sir, - We have a boy in our  
employ who will be 14 years old on  
January 9<sup>th</sup> 1894.

The inspector of factories <sup>and</sup>  
workshops has prohibited him from  
work on acct of his age, which  
of course is in accordance with the  
rules of this state.

Now this boy is a willing worker  
(Large for his age) his father is dead  
<sup>and</sup> his family are in destitute  
circumstances, his mother goes  
out trying to work so as to support  
the family with the aid of this  
boy, But at this writing the  
mother is unable to do any-  
thing on acct of female weakness  
hence the boy is the only support of family

Now we have made strong efforts to have inspector allow him to work on acct of these poor circumstances. But as said before we have met with no success. And we plead to you to do what you can for boy.

We only employ boys in accordance with the Inspector of Factories and workshops our point in this matter is only for charity as we do believe boys under 14 years should not work, But when such poor support is as is in this boy's family. we think the rule of factory inspection are to strict

Will you please do what you can for this boy. allow him to work. By doing so you will greatly aid the support for this family  
we are  
yours Respy

Hon. John P. Altgeld

Governor State of Ills

Dear Sir,--We have a boy in our employ who will be 14 years old on January 9<sup>th</sup> 1894.

The inspector of factories and workshops has prohibited him from work on a/c of his age, which of course is in accordance with the rules of this state.

Now this boy is a willing worker (large for his age) his father is dead and his family are in destitute circumstances, his mother goes out trying to work so as to support the family with the aid of this boy. But at this writing the mother is unable to do anything on acct of female weakness hence the boy is the only support of family. Now we have made strong efforts to have inspector allow him to work on acct of these poor circumstances. But as said before we have met with no success. And we plead to you to do what you can for boy.

We only employ boys in accordance with Inspector of Factories and workshops. Our point in this matter is only for charity as we do believe boys under 14 years should not work, but when such poor support is as in this boy's family, we think the rule of factory inspections are to strict.

Will you please do what you can for this boy, allow him to work. By doing so you will greatly aid the support for this family.

We await your reply,

Bauerle and Stark
